

SAED MARZOUK ALSAFADI

AI & Software Engineer

Address: Riyadh, Saudi Arabia | Email: Saed.official4@gmail.com | Phone: +966 53 651 7204 | [LinkedIn](#) & [GitHub](#): SaedAlsafadi

PROFESSIONAL SUMMARY

AI & Software Engineer with startup experience delivering AI-enabled business solutions and full-stack web applications. Skilled in machine learning, modern web development, and workflow automation, with hands-on experience optimizing business operations through AI-assisted processes. Passionate about building scalable software that transforms real-world challenges into intelligent, data-driven solutions.

WORK EXPERIENCE

Technology Operations & Applications Specialist | MINNHA IT | Sep 2024 - Present

- Manage end-to-end international university admission workflows across multiple institutions, digital platforms, and stakeholders.
- Improve operational efficiency by integrating AI-assisted workflows that reduce manual effort and increase processing accuracy.
- Collaborate with executive leadership and the CTO to optimize operational processes and support technology-driven initiatives.
- Manage CRM-based application tracking, documentation, and communication throughout the student lifecycle.

Research Data Specialist | Computer and Information Sciences Research Center | 1 Month Project

- Built and maintained a structured research publication database containing 400+ academic records across 17 standardized data fields.
- Collected, validated, and standardized publication metadata to ensure accuracy and consistency for institutional reporting.
- Developed efficient Excel workflows for large-scale data organization and quality assurance.

PROJECTS:

AI-Powered Smart Procurement Platform (Daqeeq)

React • Next.js • Supabase • Machine Learning

- Designed a full-stack B2B SaaS platform that leverages machine learning algorithms to forecast inventory demand, automate procurement workflows, and support intelligent supplier decision-making through predictive analytics.

AI Image Captioning System

TensorFlow • Keras • DenseNet201 • LSTM

- Developed a deep learning image captioning system using DenseNet201 and LSTM networks to automatically generate image descriptions from visual content.
